1. Reverse a String (Basic)

Problem: Write a function to reverse a given string.

Example: Input: "hello" -> Output: "olleh"

Answer:

```
function reverseString(str) {

    return str.split("").reverse().join("");

}
```

2. Check for Palindrome (Basic)

Problem: Determine if a string is a palindrome.

Example: Input: "racecar" -> Output: true

Answer:

```
function isPalindrome(str) {

    const rev = str.split("").reverse().join("");

    return str === rev;

}
```

3. Find the Largest Number in an Array (Basic)

Problem: Return the largest number from a given array.

Example: Input: [1, 5, 2, 9, 3] -> Output: 9

Answer:

```
function findMax(arr) {

    return Math.max(...arr);

}
```
